

ENVIRONMENTAL POLICY AND COMMITMENTS

TEKLAS;

Prioritizes the protection of environment by decreasing its environmental footprint while ensuring sustainable growth in global market, with unconditional quality, customer-oriented management, innovative technology and creative power principles as well as the vision of being the number one player in fluid systems used in heating and cooling systems in the global automotive industry.

- Acknowledges itself as a responsible member of the society about the protection of the global environment,
- In this manner, makes effort to contribute by protecting the human health and environment.
- Believes that, the whole world would have an environment that is livable and healthier only in this way.

We guarantee the below subjects in a way that will cover our all domestic and foreign locations and in line with our principle; "To protect environment and fulfill the environmental responsibilities by adapting legal requirements".

- To fulfill the related environmental legislations and obligations,
- To improve our environmental management system and increase our environmental performance,
- To prevent the pollution at the source for air water and soil quality, to minimize the waste, to reduce the negative effects on the environment of our activities and to provide the necessary human, technology and financial resources for these activities.
- To use our natural resources effectively and make them sustainable,
- To provide emergency and environmental risk management at the highest level,
- To prioritize the energy efficiency in our all processes,
- To inform notably our employees and all stakeholders about our environmental objectives and activities in order to promote environmental awareness,
- To transfer the environment that is sensitive to the climate change, clean and healthy to the next generations.
- To ensure the usage and management of safe chemical materials
- To minimize the water consumption by supporting the water efficiency projects that aim to protect water sources
