

TEKLAS QUALITY POLICY

Quality is an integrated part of TEKLAS Business Principles. These principles guide our actions to produce and deliver services that are safe, compliant and preferred.

TEKLAS Quality Policy scope of application ranges from continuous innovation of products, services, processes and systems to protection of the integrity, health and wellness of TEKLAS employees.

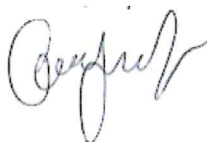

Our capability to anticipate customer expectations, the focus on Stakeholders' demands and interests, innovation, are inextricably linked to the key role that each individual plays in day-by-day operations, putting TEKLAS sustainable quality culture in practice.

Our commitment is to never compromise on Quality and Compliance of our products:

- Developing Quality Mind-Set with the objecting of developing and manufacturing of products with zero defect which are trusted and preferred.
- Continuously challenging ourselves to guarantee product conformity, prevent quality incidents trough the continuous improvement of our processes and objectives.
- Encouraging participating and development of all our Stakeholder's trough education, training, coaching and effective communication.

Quality is the most important characteristic of our products, it is about producing and delivering what we promise in the most sustainable way.
